

I urge you not to be pressured by the big Corporations (and Republicans) to give away more of the public's right to hear the truth. The media is now controlled by six conglomerates. During the Iraq war was a perfect example of how our airways practise censorship and promote mindless patriotism. I have found that the only way to get truly objective reporting is to go on the Internet, BBC, Public Radio, and alternative publications. The 'mainstream' media is a joke and its sad that the FCC with the help of an ignorant populace and our Senators and Representatives (both parties) have brought it to this place. Intelligent, curious people seeking the truth (as told in the rest of the world) must look elsewhere. Please do not allow these conglomerates any more monopoly. Thank you.
